The workshop committee is planning for this year's workshop. *Help us by suggesting topics of interest, presenters and volunteers to give a presentation.* The committee will line up national and regional speakers, but we want local folks to share their stories. It's a great venue for your first-time presentation! We encourage any pretreatment-related topics. But here are some ideas:

- New or emerging industry evaluations?
- Interesting industrial case studies?
- Treatment challenges with industrial effluent or recent advances in treatment technology

Nominate yourself or make a suggestion for a speaker and topic. Let us know by April 1<sup>st</sup> !!

Please respond to Andria Swann and Frank Dick with suggestions or questions.
